Airbus Pilot Cadet Training Programme

Fly to your future

Established in 1943, the renowned Escuela de Aviación Mexico (EAM) celebrates its 75th year as a top flight school in Mexico with 200 cadets trained per year.

The largest modern training fleet in the country with over 65 aircraft and multiple training facilities, allows you to follow a course in Mexico City with flight bases in Cuernavaca, Acapulco, Guadalajara and Atizapán.

With a long and successful history of flight cadet training, having supplied Mexican airlines with pilots for many decades, EAM uses the latest-technology simulators for the Airbus Ab Initio programme.

Further details regarding the course can be found below.

AIRBUS PILOT CADET TRAINING PROGRAMME

M E X I C O

Become an Commercial Airline Pilot with Airbus, with our competency-based training & assessment pilot cadet training programme.

Initial training (CPL/IR/ME) is carried out with our flight school partner Escuela de Aviación México.

Intermediate (JOC/MCC) & Advanced (Type Rating) training then takes place in the Airbus Mexico Training Centre.

The programme incorporates the worldwide Airbus Flight Training reference based on international EASA regulations, is approved by the Mexican DGAC and will provide you with a Mexican licence.

The Airbus Pilot Cadet Training Programme focuses on key points:

- Optimised training curriculum to provide progressive training for the individual for operationally-ready pilots.
- Prioritises the development of the fundamental pilot competencies.
- Career path management: classic and high potential cadet programmes.
- Quality training: up-to-date programmes to latest fleet & regulatory standards.
- Airbus training philosophy: engaging and effective training pathway.
