Engaged in Developing People 2021
AirBusiness Academy
/e(r) ˈbiznis eˈkædemi/ n.

We design and deliver learning solutions to develop the knowledge, skills and behaviours of professionals within and beyond the aerospace industry, worldwide.
ABOUT US

Fully customisable learning solutions
As an Airbus company, the expertise shared with our participants internationally is drawn directly from the industry experience of the global leader in aeronautics. We also tap into a well-developed network of distinguished executives from the industry to provide engaging guest speakers and subject experts during the training, adding further insight and value for the participant.

Training delivered internationally with offices and representation in

France  China  Singapore
Ensuring efficient transfer of knowledge and expertise in a hands-on, interactive environment

OUR AIRLINE BUSINESS SIMULATIONS

Providing highly interactive, competitive airline simulations in order to engage participants and increase learning retention rates.

AirManager™
Manage an airline in a competitive, realistic environment where your decisions impact the outcome of your airline’s business objectives.

Network Manager
A competitive simulation where you manage an airline network from both the airline and airport perspective.

Flexible formats allowing you to work on hard and soft skills with the option of adding corporate lectures and presentations.
For us, business transformation is the journey to align People, Process and Technology initiatives to support and create new business strategies.

We strive to foster success and well-being for managers and end-users by;

- focusing on customer needs
- creating quality content and experiences
- failing fast and learning from mistakes
- placing collaboration at the heart of everything we do
- ensuring an environment of confidence and trust
